*Grapevine reports make a distinction between "state-aided community colleges," at which local tax appropriations constitute a significant portion of institutional revenue, and "state community colleges," which receive little or no local tax appropriations. For the purposes of this report, "state-aided" community colleges are those located in states in which local tax appropriations account for at least 10% of total government funding for all community colleges in the state. Revenue data from the Integrated Postsecondary Education Data System (IPEDS) for fiscal year 2005 were used to make this determination. (In addition, community college data for five states are not reported in these tables. Minnesota and Vermont fold community college appropriations into the total appropriations reported for state college and university systems. South Dakota has no community colleges per se. Community college data reported by Hawaii are not net of student fees; thus they are not included in this analysis. Likewise, West Virginia data for community colleges are excluded, because they are not net of lottery funds.)

**The reports submitted by Colorado to Grapevine makes a distinction between "state community colleges," which receive no local tax allocations, and "local community colleges," which do receive local tax allocations. Thus Colorado appears in both the table for "state community colleges" and "state-aided community colleges."

***These are states in which some colleges receive no local tax support, although local tax appropriations account for 10% or more of total government support for all community colleges in the state. Starting in FY08, Ohio reported separate figures for two-year institutions with local tax levy support and two-year colleges without this local support. See the report for Ohio.

Data are subject to change as states grapple with revenue shortfalls in FY09. In addition, data reported for some states may not reflect administrative holdbacks requiring institutions to keep in reserve or give back a proportion of the appropriated monies.
